Composition straps  
Dimensions  
Storage Capacity

Waterproof polyester with PVC coating  
Polyester webbed mounting straps  
850 x 460 x 200mm  
Approx.60 litres

# INSTRUCTIONS FOR USE

## How to attach your spare wheel backpack to your rear mounted spare wheel.

**NOTE:** When positioning the spare wheel bag ensure it is not obstructing the number plate of the vehicle.

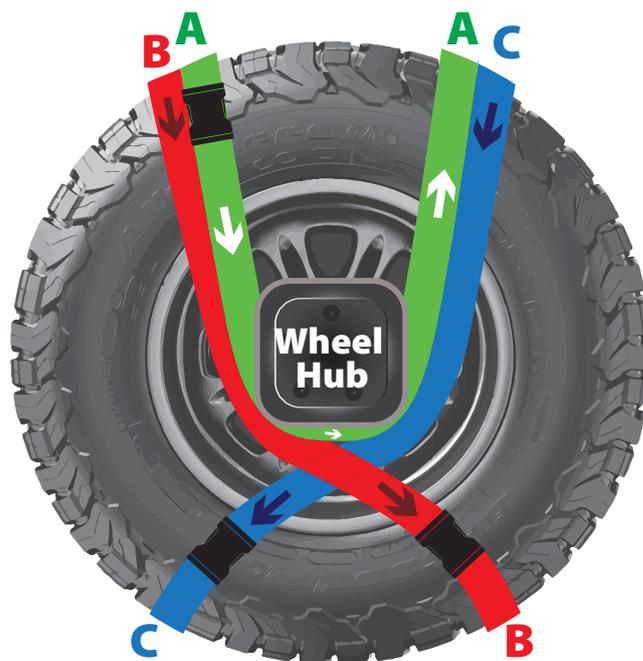

**Step 1.** Undo the quick connect buckles.

**Step 2.** Position the bag on your tyre.

**Step 3.** Run strap (A) around the back of the tyre and around the fixing point of where the tyre connects to your vehicle then back up and secure the quick connect buckle. This strap secures the bag onto the wheel and assists in minimising slouching.

**Step 4.** Feed the left (B) and right (C) hand straps over and behind the tyre in a criss cross motion, attaching the quick connect buckle to the opposite side of the tyre.

**Step 5.** Once you have the bag in the desired position, firmly tension all 3 straps.

**Step 6.** Any excess webbing can be re-fed into the buckle where possible to remove excess length.

## CLOSING THE BAG.

1. Seal the bag with the hook and loop strip located at the top of the bag mouth.

2. Roll the roll top down tightly to further secure the contents.

3. Connect the quick connect buckles on the left and right hand side bag to secure the contents.

## CARE AND MAINTENANCE

- Simply hose out and air to dry.
- Ensure the bag is completely dry before storing.
- Check the webbing straps on the bag for any nicks, cuts and wear marks. If found discontinue using the product as this will affect the secure attachment of the bag to the wheel.

## DISPOSAL

Consult your local council waste authority for information regarding disposal options.
